GRADUATE

RE: LORI CHERN, RN BScN, Certified Practice - RN Collaborate Inc

Lori Chern is Certified to Inject Botulinum Toxin-A Neuromodulator (eg: Botox, Dysport) for Cosmetic Upper Face and Myofacial Pain (Migraines, Tension Headaches, Temporal-Mandibular Disorder [TMD])

- ✓ Registrants who provide injections of botulinum toxin, dermal fillers or venous sclerotherapy must have completed relevant medical education and training prior to performing such procedures.
- ✓ Registrants must either provide these injections themselves, or following assessment of the patient, they may order a nurse holding practising registration with the BC College of Nurses and Midwives (BCCNM) to perform the injection.
- ✓ Registrants who order a nurse holding practising registration with BCCNM to provide these services must be aware of the extent of training and the ability of the nurse to perform the injections and meet the standard of care.
- ✓ At the time of the procedure, the ordering registrant or another registrant who has assumed responsibility must be present within the facility and immediately available for consultation.

College of Physicians & Surgeons of BC, February 2021
